## Assignment –22
### Global Aspects of SQL.

1) Create a database space (tablespace) called "Myspace" and make it the default tablespace for Parag's tables.

2) You have been granted SELECT on Ajita's Orders table. Enter a command so that you will be able to refer to this table as "Orders" without using the name "Ajita" as a prefix.

3) If there is a power failure, what will happen to all changes contained in the current transaction?
