Assignment – 15
Using Subqueries with DML Commands.

1) Assume there is a table called Multicust, with all of the same column definitions as Salespeople. Write a command that inserts all salespeople with more than one customer into this table.

2) Write a command that deletes all customers with no current orders.

   create table multicust_dac227
   AS
   select * from salespeople_dac227
   where snum IN(select snum from customers_dac227
   having count(cnum)>1
   group by snum);

3) Write a command that increases by twenty percent the commissions of all salespeople with total current orders above Rs. 3,000.

   update salespeople_dac227
   SET comm = 1.2 * comm
   where snum IN(
   select snum from orders_dac227
   HAVING SUM(amt)>3000
   GROUP BY snum)
